- Collectable **3-panel digipack** with **2CDs**, **16-page booklet**, new notes, previously unpublished period photographs in a **limited pressing of 1000 units**

ORIGINAL REVIEWS

"Totally overwhelming, decidedly oddball, extremely exciting if played loud." Record Disc & Mirror

"...some of the most original and vital music currently being made in Britain ... looks like we might be in on the ground floor of a musical revolution here." Beat Instrumental

"Fairly far-out ... a bizarre mixture of Queen and Genesis, with Rick Wakeman offering encouragement from the bar." Melody Maker

"Two men from Britain sounding like twenty..."

- that's how America greeted this visionary British '70s synth/progressive fusion act and the quote still evinces today the potency and scale of their output. Formerly in **Second Hand** and **Chillum**, multi-instrumentalist and keyboards wizard **Ken Elliott** and percussionist **Kieran O'Connor** reached to every corner of music in a quest to build in 1974's **'Things To Come'**, a sweeping titan of overdub. Riding on its success, the two recruited the likes of **Hugh Banton (Van Der Graaf Generator)**, jazz fusion singer **Pepe Lemer** and husband **Pete** and **Steve Cook** (the latter two in **Gilgamesh**) to record the equally towering if more traditionally progressive **'Psi-Fi'** the following year. This collector's 2CD digipack reissue with a 16-page story/photo booklet brings both albums, re-mastered from the original studio tapes, and in the process exposing new dimensions to the innovatory genius of **Seventh Wave**.
